

Permit No.: _____ Issue Date: _____
--

City of Alma
Department of Public Services
Removal & Repair or Construction of Driveway Approach

- | | |
|---|--|
| 1. Location (address): _____ | 4. Paving material: Concrete [] or Bituminous [] |
| 2. New [] or Replacement [] | 5. Curb removal: _____ feet |
| 3. Width as measured at property line: _____ feet | 6. Furnish drawing of driveway as required. |

Driveway approaches may be either concrete or bituminous construction. Concrete (6 sack w/air entrainment) approaches shall have a minimum thickness of 6". Bituminous approach construction shall consist of 6" (compacted) 22A gravel and 22@ bituminous concrete mix. (See attached form for City standards for driveway detail # _____.)

After the driveway approach subgrade has been graded and shaped, and prior to placing any surface material, ***the City Engineering Department shall be notified one day in advance at (989) 463-8336***, so that an inspection can be arranged. No surfacing material shall be placed without prior approval.

The applicant agrees to provide, erect, and maintain all necessary barricades, lights, warning signs, and other devices to protect the public while the work is in progress.

The City may correct or initiate any work necessary to ensure the safety of the general public or compliance with the permit conditions. All costs required to do so shall be the full responsibility of the permittee.
